

THE BEST SOLUTIONS UNDER THE SUN ARE NOW UNDER ONE ROOF

COATING PRODUCTS

Our one-component Z-VOC coating products are formulated to provide the protective capabilities of today's top-grade paints and coatings without producing hazardous VOC emissions. Versatile, cost-effective, and convenient, Z-VOC coatings are offered in both clear and custom colors that can be used on nearly any porous or non-porous surface.

UVC CURING/ APPLICATIONS CENTER

With a full-scale curing chamber and application center on-site, you can experience firsthand the advantages of using UV coatings and curing processes.

UVC RESEARCH & TESTING FACILITY

The UV Coatings laboratory facility is as cutting edge as UV technology itself. As the center for product research, development, and testing, we equipped this area with a range of advanced testing instrumentation to provide our customers with the best technical service possible.
